Federico Montini
Product & UX/UI Designer

After graduating from Politecnico di Milano with a degree in Product Design, I am continuing to expand my skills in this field, this time focusing on a mix of Visual design and UX/UI.
I'm a sucker for multidisciplinarity, passionate about fashion, technology and art. I have the ability to work under tight deadlines, good communication skills and I'm a team player.
I spend my free time watching anime and browsing clothing marketplaces like Grailed, Vinted and Depop hunting for goodies to add to my closet.
